

RING SIZE CHART

Choose a ring you own that perfectly fits the finger on which you plan to wear your new ring. Place it on the circles below until you find a circle where the black outline is just visible on the inside of your ring. If the ring you are placing on the circle seems to fall between sizes - we recommend to take a half size bigger. The circle method should give you a good idea of your ring size. However the most accurate method is to measure your finger with a ring gauge.
